DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-3, 6, 9, 10, 11, 13, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hiroo et al (Process Cartridge and Image Forming Device, published on May 13, 1994, and further in view of KONICA CORP: Adhesive Material for Processing Units, October 19, 2001.

As regards to claim 1, Hiroo et al teach an image forming apparatus, including a photo receptor having a plurality of processing devices to form an image, wherein at least one of the processing devices (figures 1-2). However, Hiroo et al do not specifically teach an adhesive material including a volatile gas component in an amount of 0.1-9. KONICA CORP (JP 2003129027) teaches an adhesive material including a volatile gas component in an amount of 0.1-9 $\mu\text{g}/\text{cm}^2$ (paragraphs 001-008, 0015).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to adapt KONICA CORP's teaching with the teaching of Hiroo et al to make the process of image formation cheaper and simpler for printer application.

Claims 9 and 15 are also rejected on the same basis as claim 1 above, using same references.

As regards to claims 2, 3, 6, 10, 11, 13 and 16, Hiroo et al do not specifically teach various amounts of adhesive material support and solvent residue. KONOCA CORP (article as stated above) teaches adhesive material support and solvent residue (figures 1, 2; see means section).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to adapt KONICA CORP's teaching with the teaching of Hiroo et al to make the process of image formation cheaper and simpler for printer application.

2. Claims 4, 5, 7, 8, 12, 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brij B. Shrivastav whose telephone number is 571-272-2250. The examiner can normally be reached on 7 AM to 4 PM.
